PROFILE SUMMARY

Electronics & Telecommunication Engineering undergraduate with a **9/10 CGPA** and a strong foundation in **C, C++, Python, MATLAB, embedded systems**. Hands-on experience developing sensor-based IoT systems, database applications, and algorithmic solutions. Strong analytical and problem-solving abilities with an interest in **engineering analysis, simulation, and CAE workflows**. Completed **MATLAB Onramp** and **Machine Learning Onramp** courses and eager to apply technical knowledge to real-world engineering projects.

EDUCATION

B.Tech - Electronics & Telecommunication Engineering

2023 – 2027

Bharati Vidyapeeth College of Engineering, Pune

CGPA: 9/10

TECHNICAL SKILLS

Programming Languages

C++, Python

Engineering & Analysis

MATLAB, Data Analysis

Web Technologies

HTML, CSS, JavaScript

Database & Tool

MySQL, Power BI, Git, GitHub

Hardware & IoT

ESP32, Arduino IDE, Sensor-based Systems

PROJECTS

Smart IoT Weather Monitoring System

ESP32, Python, MySQL, HTML, CSS, JavaScript

Real-time environmental monitoring platform collecting weather data for live analysis and alerts.

- Designed IoT-based real-time sensor system
- Stored data using Python and MySQL
- Built visualization dashboard
- Implemented alert automation

Gaming Database Management System

Python, MySQL

Relational database system to manage users, games, scores, and comments efficiently.

- Designed multi-table schema
- Implemented CRUD operations
- Optimized database queries

Student Performance Analyzer (DSA Based System)

C++, Python

Algorithm-driven academic analysis system for ranking and reporting.

- Used data structures for record handling
- Applied sorting and searching algorithms
- Generated performance reports

CERTIFICATES

- Matlab onramp 
- Machine Learning Onramp
